

Our Proposal

Moving Beyond "Anyone Will Do"

Quality over Quantity in Recruitment

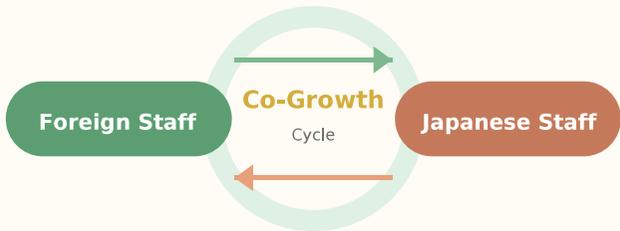

Isn't it time to stop accepting 'just anyone' when it comes to foreign care workers?

Clearly define which country, what kind of workers, and what support system you will provide.

That is the shortest path to success.

Better Foreign Workers = Better Japanese Staff

Supplementing quality in foreign workers also leads to improving the quality of your Japanese staff. It creates a positive cycle of mutual growth.

Foreign and Japanese workers learning from each other, growing together — That is our vision of "Co-Growth"

Becoming a Facility of Choice

We're not just filling headcount.

Our goal is for foreign workers to take pride in their work and for your facility to become a place they actively choose.
